I have provided an accurate description of the animal care and use to be followed in the proposed research activity. Failure to report to the IACUC significant changes in the protocol may place the investigator in violation of federal and institutional regulations. I assume responsibility along with Secore Rabbit Farm and Laboratory, Inc. (SRFL) for compliance with such regulations for all personnel involved with this protocol. I give assurance that this protocol does not unnecessarily duplicate previous experiments. I also give assurance that no biohazardous or radioactive materials, toxins, carcinogenic, infectious, or transmissible agents have been given to SRFL for injection into animals. I understand that the animal(s) supplied to SRFL will be used to produce custom antisera in an animal(s). This animal(s) will be owned solely by SRFL. The animal will reside only at SRFL. The animal(s) will not be owned by the investigator nor the investigator's institution. However, all of the serum and other products obtained from the animal(s) will not be owned by SRFL but will be the property of the investigator. When I determined that it is time to terminate my project, SRFL shall either euthanize or euthanize the animal(s). I have also read and understand the additional information on pages 12 and 13 of this form.

Secore Rabbit Farm and Laboratory, Inc. gives assurance that all injection, bleeding and euthanasia procedures performed at our facility are performed by qualified animal technicians skilled in minimizing animal discomfort, distress and pain and have been approved by our IACUC. (See our IACUC Guidelines for more detailed information on methods of bleeding, injecting and euthanasia.) Personnel conducting procedures on the species being maintained or studied will be appropriately qualified and trained in those procedures. All animal procedures will be performed using aseptic techniques, gloves, sterile instruments, etc. SRFL also assures that the animal's living conditions will be appropriate for their species in accordance with and exceeding the standards set forth in the Animal Welfare Act, and contribute to their health and comfort. The housing, feeding, and nonmedical care of the animals will be directed by the attending veterinarian and Patricia M. Haab, institutional official, trained and experienced in the proper care, handling, and use of the species being maintained and studied. Medical care for animals will be available and provided as necessary by a qualified veterinarian. SRFL will maintain confidentially over all records and other aspects of the investigator's project. SRFL and Laboratory, Inc., along with the Principal Investigator, assumes responsibility for compliance with federal regulation for all personnel involved with this protocol.

I have provided an accurate description of the animal care and use to be followed in the proposed research activity. Failure to report to the IACUC significant changes in the protocol may place the investigator in violation of federal and institutional regulations. I assume responsibility along with Pocono Rabbit Farm and Laboratory, Inc. (PRF&L) for compliance with such regulations for all personnel involved with this protocol. I give assurance that this protocol does not unnecessarily duplicate previous experiments. I also give assurance that no biohazardous or radioactive materials, toxic, carcinogenic, infectious, or transmissible agents have been given to PRF&L for injection into animals. I understand that the antigen I supply to PRF&L will be used to produce custom antisera in an animal(s). This animal(s) will be owned solely by PRF&L. The animal will reside only at PRF&L. The animal(s) will not be owned by the investigator nor the investigator's institution. However, all of the serum and other products obtained from the animal(s) will not be owned by PRF&L but will be the property of the investigator. When I determined that it is time to terminate my project, PRF&L shall either exsanguinate or euthanase the animal(s). I have also read and understand the additional information on pages 12 and 13 of this form.

I have provided an accurate description of the animal care and use to be followed in the proposed research activity. Failure to report to the PAFRLC significant changes in the protocol may place the investigator in violation of federal and institutional regulations. I assume responsibility along with Pocono Rabbit Farm and Laboratory, Inc. (PAFRL) for compliance with such regulations for all personnel involved with this protocol. I give assurance that this protocol does not unnecessarily duplicate previous experiments. I also give assurance that no biohazardous or radioactive materials, toxic, carcinogenic, infectious, or transmissible agents have been given to PAFRL for injection into animals. I understand that the antigen supply to PAFRL will be used to produce custom antisera in an animal. This animal(s) will be owned solely by PAFRL. The animal will reside only at PAFRL. The animal(s) will not be owned by the investigator nor the investigator's institution. However, all of the serum and other products obtained from the animal(s) will not be owned by PAFRL but will be the property of the investigator. When I determined that it is time to terminate my project, PAFRL shall either exsanguinate or euthanize the animal(s). I have also read and understand the additional information on pages 12 and 13 of this form.
